PROFESSIONAL SUMMARY

MCA Graduate and Full-Stack Developer specializing in architecting scalable web applications, business management software, and secure RESTful APIs using **React.js, Node.js, Express.js, and MongoDB**. Proficient in database schema design, JWT authentication, and Role-Based Access Control (RBAC). Experienced in functional testing, API validation, and end-to-end workflow verification to deliver robust, high-performance web systems.

TECHNICAL SKILLS

Frontend	**React.js**, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive UI/UX Design
Backend & APIs	**Node.js**, **Express.js**, RESTful APIs, MVC Architecture, Middleware Chaining, Centralized Error Handling
Database & Storage	**MongoDB**, **Mongoose ODM** (Schema modeling, indexing, aggregation), MySQL (Relational queries)
Security & Auth	**JWT Authentication**, Role-Based Access Control (RBAC), Helmet Headers, CORS, Input Sanitization & Rate-Limiting
Testing & Tools	**Functional Testing**, **API Contract Testing**, Postman, Git & GitHub, npm, AI-Assisted Workflow Dev Tools

WORK EXPERIENCE

MERN Stack Developer – Inspire Software Co.

`July 2026 - Present`

- **Software Architecture:** Designing and building custom business management software and web solutions tailored to operational requirements.
- **Frontend Engineering:** Implementing responsive, high-performance React.js user interfaces connected to optimized Express RESTful endpoints.
- **Database Optimization:** Modeling MongoDB collections and aggregation pipelines, ensuring strict schema validation and query efficiency.
- **Quality & Reliability:** Conducting functional testing, API validation, and bug triage to guarantee robust, production-ready deliverables.

MERN Stack Developer – ScubeN Techlabs Inc.

`Dec 2025 - May 2026`

- **SaaS & CRM Systems:** Engineered core application modules for multi-tenant business platforms using React, Node, Express, and MongoDB.
- **Auth & Permissions:** Implemented secure token-based JWT authentication combined with granular Role-Based Access Control (RBAC).
- **API Integration:** Developed structured RESTful endpoints with standardized JSON response envelopes, pagination, and error handlers.
- **Testing & Verification:** Executed end-to-end API test suites in Postman and verified client-server workflows prior to staging deployments.

FEATURED PROJECTS

AI-Powered Interview Preparation Platform

`Full-Stack Project`

React · Node.js · Express · MongoDB · Gemini API · JWT · Puppeteer

- Built an end-to-end platform featuring **automated resume parsing** from multi-page PDFs, skill-gap analysis, and mock interview simulations.
- Integrated **Google Gemini API** for deterministic technical evaluation, personalized question generation, and score breakdown.
- Engineered **automated PDF report generation** using Puppeteer and implemented strict request validations with Zod schemas.

Artifest – Enterprise CRM & Business Platform

`Production CRM Platform`

React.js · REST APIs · JWT Auth · RBAC · MongoDB · Node.js

- Collaborated on a multi-module CRM managing **sales lead pipelines**, project tasks, digital invoicing, and team attendance tracking.
- Implemented **Role-Based Access Control (RBAC)** across managerial roles, automated invoice workflows, and daily attendance summaries.

EDUCATION & CERTIFICATION

Master of Computer Application (MCA) `2024 - 2026`
Gujarat Technological University (GTU)
Academic Score: CPI 8.45 / 10

Full-Stack Web Development Course `Certified`
Apna College
React.js, Node.js, Express, MongoDB, REST APIs, System Architecture
